Election/Restrictions

1. This action is in response to the application filed on December 21, 2001. Claims 1-17 are pending.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

 I. Claims 1-4 and 9, drawn to searching for a share secret from a share secret table in a portable electronic authorization device, classified in class 707, subclass 1-6 and 9-10.

 II. Claims 5-8 and 10-17, drawn to deriving a shared secret and attaching it with a secured message, classified in class 705, subclass 51 and 64.

3. The invention are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as searching for a share secret from a share secret table, which can be used for authentication of a website access other than used for exchanging a secured message; invention II also has separate utility such as deriving a shared secret, which can be used for developing access keys for a database other than used for exchanging a secured message. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
